

BOOK REVIEWS

This book is insightful and very well written. I read through the kindle version and now will reread the hard copy with my Bible and highlighter handy. I really liked the way the book went back and forth comparing the Bible to our current times and circumstances happening around the world. I liked the personal stories and interpretations given by the author. I think this book would make a great Bible study! *(Debbie)*

Anyone who reads this book will get a clear and capsuled picture of God's plan for His world and for each of us. The reader should come to understand much more about God's personality and His drive to fulfill His plan in each of us. People who are interested in learning more about God and His plan but do not want to "tackle" the whole Bible would be especially interested in this book. *Rediscovering the Divine* is very well written. *(Ann)*

If you are a Christian Apologist this book is for you! Apologist simply means defending your faith. Suz lays out many of the most contemporary apologetics concepts in an easy to read format. She also puts it together in an easy to understand timeline that allows her readers to connect the dots and more fully understand God's plan to redeem the world! Use this book to present some of the more complex apologetic explanations to your unbelieving friends without requiring of them a PHD in theology. I would recommend reading the entire book first in a couple of days (it goes fast), and then going back and meditating on each chapter's message on it's own. I also believe this book would be a great addition to any bible study curriculum. Thank you Suz for delivering this very well written book. *(Joe)*

Rediscovering The Divine: Seeing God in a Whole New Way is a book that I did not want to put down. Each chapter engages the reader in a new, fresh look at how our Heavenly Father has a plan for all of us, which at this time is unfolding at a rapid pace. I have been a Christian for a long time and I have read through the Bible often. In this book, there are many "golden nuggets" I never noticed before. It also gives a very clear and fascinating look at what pleases and hurts our awesome God. I feel this book will be a good read for individuals or that it could be used for Bible studies as well. *(Helene)*

I appreciate how the author weaves the story of God into our history from the beginning of time. Starting with creation, to Abraham, to the book of Revelation, God is there and orchestrating the events in our lives. God has a plan for each of us which we can choose to accept or reject. This is a thought provoking book that will have readers asking themselves if they believe and accept what God has in store for them. The author is clear that, at some point in our lives, we will have to decide.

(Dianne)

Suz' book is a must read for anyone interested in learning more about Yahweh's grand plan revealed in an easily understandable and logical way. The spirited narrative takes the reader from Old Testament to New with applicable scripture and personal anecdotes woven throughout. While many passages touched me on a deeply personal level, the overarching message about how much our supreme Father loves us and wants the best for us will stick with me always as I continue my personal journey on the path to knowing Him. Bible study leaders and participants, this book is for you! There's a year's worth or more of subject matter sure to engage the group in spirited conversation and fellowship. *(Anne)*
